Education

University of California, Riverside December 2026
Bachelor of Science in Computer Science *Riverside, California*

Experience

Software Engineering Intern June 2026 - August 2026
Wells Fargo *Phoenix, Arizona*

- Engineered an AI-powered internal developer tool that automates exception-to-pull-request remediation, reducing manual debugging time by roughly 75%, from 20 minutes to under 5 minutes for supported exceptions.
- Architected a modular skills-first framework by implementing 16 Agile development stories and 48 reusable Copilot skills for exception analysis, repository mapping, fix generation, validation, and pull request creation.
- Integrated SQL and GitHub MCP tools with Copilot, enabling access to exception data and repository context.
- Implemented deterministic confidence scoring, guardrails, and fallback mechanisms to improve output reliability.

Full-Stack Developer March 2026 - May 2026
Universal Craft, Inc. *Los Angeles, California*

- Launched the first e-commerce website for a craft supply business using Next.js, TypeScript, Firebase, Stripe, and Tailwind CSS, enabling customers to browse 20+ multi-variant products and complete purchases online.
- Designed frontend with React Context and 15 reusable components across catalog, product, cart, and checkout.
- Integrated Stripe, Firebase Auth, and Firestore to enable secure checkout and persistent order storage.
- Established a production-ready CI/CD workflow using GitHub Actions and Vercel with automated quality checks.

Artificial Intelligence Fellow May 2025 - May 2026
Break Through Tech AI at Cornell Tech *Remote*

- Selected from 3,000+ applicants for a year-long AI fellowship, earning Cornell's ML Foundations certificate.
- Built ML models (Logistic Regression, Random Forests, XGBoost) on financial time-series data from 8,000+ U.S. companies in collaboration with the Fitch Group for corporate bankruptcy prediction and credit risk analysis.

Undergraduate Research Assistant October 2024 - December 2025
University of California, Riverside (UCR) *Riverside, California*

- Implemented ML classifiers (Random Forests, SVM, XGBoost, MLP) to distinguish 3,360 student vs AI-generated code samples using TF-IDF and CodeBERT embeddings, supporting academic integrity research in CS education.
- Collaborated weekly with faculty and PhD mentors on literature review and experimental design.

Projects

Digital Photo Booth Studio github.com/kellyma626/photobooth
React, TypeScript, Django, PostgreSQL, Tailwind CSS, Vercel *April 2026 - June 2026*

- Built a full-stack social photo booth web app enabling users to create, customize, and share photo strip cards with 4 themed styles, supporting image uploads, captions, and live previews.
- Developed secure authentication and social system using JWT and Google OAuth, enabling user accounts, friend requests, and persistent sessions.
- Engineered social feed and interaction features (likes, comments, ratings) with React frontend and Django REST APIs, integrated with PostgreSQL and Vercel Blob for media storage and deployment.

UCR Student Organization Websites github.com/acm-ucr/winc-website
React, Next.js, Tailwind CSS, GitHub *October 2023 - March 2024*

- Constructed responsive websites for 2 student organizations, improving event access for 100+ members.
- Identified inconsistencies in hardcoded event data and refactored into reusable components, removing 250+ lines of redundant code and initiating broader codebase cleanup.
- Coordinated with a 9-developer Agile team in sprints to prioritize features and enhance mobile responsiveness.

Technical Skills

Languages: Python, C++, TypeScript/JavaScript, HTML/CSS, SQL
Frameworks: React, React Native, Next.js, Node.js, Django, Tailwind CSS
Libraries: NumPy, Pandas, scikit-learn, Matplotlib, Seaborn, Keras, HuggingFace, PyTorch, TensorFlow
Databases & Tools: Git, GitHub, GitHub Actions, Vercel, AWS, PostgreSQL, Firebase, Supabase, Figma
